creative | reliable | introverted
honestdirect | problem-solver
quick perception | integrity
communicative

Interests

Web Development | Fitness
Running | Digital Revolution
Crypto Currencies | Books
Nutrition | Cooking | Travel
Techno | Rubik's Cube

Working Expirience

○ Front-End Developer
Sesame | Spain, Barcelona
2021 - Today

Sesame AI is an enterprise access management tool harnessing the power of machine learning and computer vision. In a team of six developers, my responsibilities was to develop the front-end for the admin dashboard with NextJS, SASS and TypeScript. Also I was in charge for planning and defining the state management wit Redux and setting up an email-server to deliver automated emails.

○ Front-End Developer, System Administrator
Arcmedia AG | Lucerne, Switzerland
2018 - 2020

Arcmedia is a web agency with a focus on e-commerce and email marketing. During two years I worked as a front-end developer and was responsible for developing forms with HTML, CSS and JavaScript for well-known clients. On top of that, I developed professional HTML email templates for our clients. I was also responsible for our IT infrastructure as a system administrator, managing all accounts and hardware for the company.

Education

○ Fullstack Web-Engineer
Codeworks | Spain, Barcelona
2020 - Today

Codeworks is an immersive coding bootcamp focusing on JavaScript and web development. In 12 weeks of full-time training and over 1000 hours of coding and three projects, I deepened my knowledge in JavaScript, React, TypeScript, NodeJS, Express and many other technologies and frameworks.
